

Clean Energy Study University of California Office of the President

The University of California system is a leading public undergraduate and graduate educational institution with an enrollment of approximately 250,000 students on 10 campuses. The system also includes 5 Medical Centers and 3 National Research labs.

Throughout her career with the University of California, Maric Munn played a major role in energy and sustainability planning efforts. Once Ms. Munn left UCSF after 10 years as their Executive Director of Facilities Services, San Timoteo Energy Associates was retained to work on a variety of projects.

Clean Energy Feasibility Study 2002:

In her role as Associate Director of Energy and Utilities for University of California Systemwide President's Office, Maric Munn authored the feasibility study which led to the creation of the original UC Clean Energy Sustainability Policy. The study included both an energy efficiency retrofit project assessment and local and grid based renewable energy assessments
